## EDUCATION

### University of Waterloo

Sep. 2023 - Apr. 2028

Bachelor of Computer Science (BCS) - Co-op, Artificial Intelligence & Business Specialization

- **Relevant Courses:** Data Structures, Algorithms, Operating Systems, Databases, OOP, Digital Logic, Compilers, Probability, Statistics
- **Scholarships:** René Descartes National Scholarship (\$25,000), President's Scholarship of Distinction (\$2,000)
- **Awards:** 1st Place – 2025 CxC Datathon (Federato Track, \$3,500), Best AI Smart Contract Auditor – ETHDenver 2025 (\$3,000), 1st Place – 2024 BDO Future Leaders Challenge (\$4,000), 1st Place – Hack the North 2022 (Sonr Track, 4x AirPods Max prize)
- **Activities/Societies:** Data Science Club (Vice President), Wat Street (Backend & ML Engineer), WATonomous (Software Engineer)

## EXPERIENCE

### Meta, Production Engineer Intern | Menlo Park, CA

Jun. 2026 - Aug. 2026

- Built alerting infrastructure for ads oncall teams (**Python, distributed SQL, Thrift**) using scheduled data pipelines that profile 800+ alerts/rotation with 91% readiness score, cutting AI agent coverage analysis from days of manual investigation to under 10 minutes
- Automated permissions resolution with a simulation engine that replays historical steps, auto-generating ACL fixes at 88% accuracy

### Suno, Software Engineer Intern | Cambridge, MA

Aug. 2025 - Dec. 2025

- Constructed new routes and token auth to productize Suno's AI music API (**Django, AWS S3**), launching pilot access to 1,000+ users
- Implemented real-time, queue-based architecture for Suno Radio (**React TS, Ably**), reducing radio song generation costs by over 4x
- Eliminated recurring **Postgres** lock spikes by reworking metadata writes to **Redis** cache, cutting P95 latency from 5s to sub-300ms

### BirdseyePost, Software Engineer Intern | Toronto, ON

Jan. 2025 - Apr. 2025

- Spearheaded full-stack development and unit/E2E testing of SnapCapture (**FastAPI, React, Redis, GCP Pub/Sub, Terraform, Pytest, Playwright**)—a new real-time engagement & purchase attribution system that increased average app session duration by 35%
- Made internal web portal for managing print orders using **Next.js & Postgres**, enhancing visibility and managing over \$1M in ARR
- Created cart abandonment data ingestion pipeline with the **Shopify API**, deploying via **Docker & Kubernetes** to double throughput

### Candle (YC F24), Software Engineer Contractor | San Francisco, CA

Oct. 2024 - Mar. 2026

- Led in-app messaging & photo sharing feature for iOS/Android app (**React Native**)—60,000+ chat threads now being created daily
- Optimized **React hooks** and function calls to reduce **Convex** database bandwidth costs by 22%, supporting over 1 million users
- Shipped AI feature for couples to discover personalized, local date ideas (**GPT 4.1 API**)—grew premium user conversion rate by 3%

### Garage (YC W24), Founding Engineer Intern | New York City, NY

May 2024 - Aug. 2024

- Designed web features and improved search/sorting algorithms with **Next.js & Express**, growing site traffic by 65% to 1,100 DAUs
- Architected truck recommendation system using vector embeddings (**OpenAI API, Pinecone**) and AI appraisal tool (92% accuracy)
- Assembled web scraping pipeline (**Python, BeautifulSoup, Supabase**) to aggregate dataset of 1,500+ fire trucks and inform pricing

## PROJECTS

### BrokeChain | *Python, FastAPI, Solidity, React JS, CSS, Express, OpenAI API, GitHub OAuth*

- Built and fine-tuned an AI agent to scan **Solidity smart contracts** for security vulnerabilities, with **GitHub OAuth** integration
- Won \$3,000 USD at ETHDenver 2025 (the world's largest Ethereum conference) and got featured in a Waterloo news article

### Name the Pokémon | *React TS, Next.js, Tailwind CSS, Express, Socket.IO, Vercel*

- Solo developed a Kahoot-style web multiplayer Pokémon guessing game using **Next.js and WebSockets** - namethepokemon.com

## SKILLS

**Languages:** Python, JavaScript/TypeScript, Java, C/C++, Swift, SQL, Solidity, Racket, Bash, Thrift, HTML/CSS

**Libraries/Frameworks:** React/React Native, Next.js, Express, Tailwind CSS, FastAPI, Flask, Django, Scikit-learn, Pandas, NumPy

**Tools:** Linux, Git, Docker, Kubernetes, Terraform, Redis, Postgres, AWS/GCP/Azure, Snowflake, Databricks, Datadog, Ably, Vercel
